Northwind Analytics - IT Security Policy

Passwords. Passwords must be at least 14 characters long and must not reuse any of the previous five passwords. Passwords must be changed immediately if a compromise is suspected.

Multi-factor authentication. Multi-factor authentication is required for email, the VPN and all administrative consoles.

Devices. Company laptops must use full-disk encryption. Screens must lock automatically after 5 minutes of inactivity. USB storage devices are blocked by default; exceptions require approval from the security team.

Incidents. Lost or stolen devices must be reported to the IT service desk within 24 hours. Suspected phishing emails must be reported using the report button in the mail client.

Training. All employees must complete security awareness training once a year. New employees must complete it within their first 30 days.
